

Care Plan Updates:

1. Care Plan Type:

Added to identify the Appointment type such as Certification or RD visit. Care plan type options include Certification, Catg Change, Health Screen, Registered Dietitian, Breastfeeding, Nutrition Education and VOC.

2. Assessments - Nutrition Risks:

Risks assigned at certification will be separated from risk assigned at the health screen. Certifications risks are any risks at certification (or within the 24 hour edit period if certification is run again). New risks are any risks assigned at the health screen or if any edit to the participant file resulted in a new risk code.
